Projects

Expense Tracker

React.js • Node.js • Express.js • PostgreSQL • Material UI • JWT Authentication

- Developed a full-stack Expense Tracker application using React.js, Node.js, Express.js, and PostgreSQL, enabling users to securely manage their personal expenses through a responsive and intuitive interface.
- Implemented JWT-based authentication and authorization to provide secure user login, protected routes, and isolated expense data for each authenticated user.
- Designed and integrated RESTful APIs with PostgreSQL to support complete CRUD functionality, along with advanced filtering and sorting of expenses based on category, date, and amount for efficient expense management.
- Built an interactive analytics dashboard using charts to visualize spending trends and category-wise expense distribution, helping users gain meaningful insights into their financial habits.

- Live Demo : expense-tracker-git-main-coderules.vercel.app/dashboard

Healix (Healthcare Support Portal)

React.js • Vite • React Router DOM • CSS3 • JavaScript • Vercel

- Developed a responsive healthcare support portal using React.js that enables patients to submit support requests, volunteers to register for healthcare initiatives, and users to connect with the organization through dedicated service modules.
- Designed a modular single-page application with React Router DOM and reusable components, ensuring seamless navigation and an intuitive user experience across desktop, tablet, and mobile devices.
- Implemented an interactive FAQ assistant to provide instant automated responses to common healthcare queries, improving information accessibility, and deployed the application on Vercel for reliable public access.
- Github : github.com/harshchauhan06/healthcare-support-app
- Live Demo : healthcare-support-app-five.vercel.app

AI Resume Reviewer

Python • Flask • Groq API • Llama 3.1 • HTML5 • CSS3 • JavaScript • REST API

- Developed an AI-powered resume reviewer that analyzes resumes against job roles and provides personalized improvement suggestions.
- Integrated the Groq API with a Flask backend to generate intelligent feedback using prompt engineering and resume text preprocessing.
- Built a responsive web application with robust API validation, exception handling, and secure environment-based configuration for reliable deployment.
- Github : github.com/harshchauhan06/Resume_Reviewer_project

TechnicalSkills

Languages	C/C++, JavaScript, Python, SQL
Frontend	React.js, HTML5, CSS3, Material UI, Vite, React Router DOM
Backend	Node.js, Express.js, REST APIs, JWT
Database	PostgreSQL
Deployment	Vercel , Render
Tools	Git, GitHub, Postman, VS Code
Core Concepts	Data Structures & Algorithms, OOP

Education

Abes Engineering College

B.Tech in Computer Science and Engineering

• 7.67/10

Ghazibad, India
September. 2024 - May. 2028

Certifications

- Complete Full-Stack Web Development Bootcamp — Udemy (Dr. Angela Yu, 2026)
- Exploratory Data Analysis — FutureSkills Prime (NASSCOM)
